

## **East Anglia**

### **Support for Schools**

#### **The Offer:**

Jobcentreplus Support for Schools is demand led, flexible and responsive, aimed at supporting the school to deliver information on options available to pupils when making decisions about their future.

**For teachers** it could be that we can support them with upskilling on apprenticeships which now are available at degree level and the local labour market so they are able to support pupils to access what's right for them.

**For pupils (aged 12-18)** we can deliver small workshops to advise on cv's, interview techniques/skills, employment, traineeships and apprenticeships and post 16 education. .

**For parents/carers** advice and information on skills and employment in the area, routes to employment via traineeships/apprenticeships.

**This list is not exhaustive and in discussion with the school we can agree the support required and method of delivery**

Our aim is to give the school the support to give each pupil a clear understanding of 'what's out there' that suits their skills and academic achievements to enter employment once their education has been completed. This can be enhanced by offering mock interview sessions, interview tips, cv completion, confidence building and motivational presentations from employers.
