

Year 4 Home Learning, Week Beginning June 1st

Dear Parents / Carers,

I hope you are all well and staying safe. Here is the home learning for this week.

Study Ladder – for daily practise of Maths and English skills.

Activelearn

Bug Club for reading comprehension. Each child has been assigned a book. All they need to do is log in to their Activelearn account and click on it. Whenever you see the bug icon  click it and you will get comprehension questions. I will be able to read your child's answers, see their progress and set new books as required. If your child cannot remember their login details just let me know at rleaver97r4@nsix.org.uk.

Abacus for Maths games.

Spellings – This week's spellings are all linked to our Science.

Science

We will be doing two strands of Science.

1. Evolution, Adaptation and Inheritance

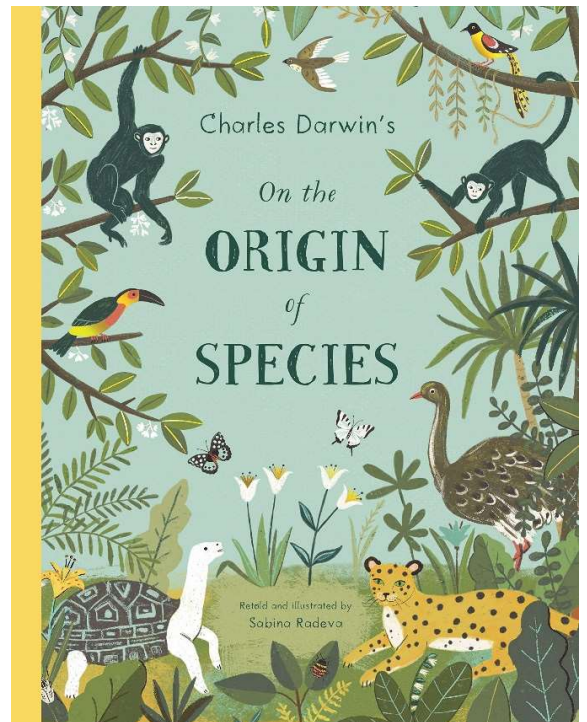

Children will

- learn all about how living things change over time
- recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents
- identify how animals and plants are adapted to suit their environment

We will use Charles Darwin's *On the Origin of Species* as retold and illustrated by Sabina Radeva.

This is an amazing book to keep in your collection,

but you do not need to buy it - key pages and extracts will be provided for you in each lesson.

2. Anglia Water Lesson 4 – Being Water Wise

Thank you for your continued support. Please email with any queries.

Mr Leaver
