

Grebes Distance Learning – Week Beginning 15.6.20

Dear Parents, Carers and Grebes,

I have loved reading your Inheritance Profiles this week! If you are still working on yours, have a look at the examples up on the website.

Science 1 – Evolution, Inheritance and Adaptation – Lessons 2c and 3

This week in Science we recap our learning about Inheritance and then move on to focus on Natural Selection. Why do some species survive and others become extinct?

Science 2 – Anglia Water – Lesson 7: Cleaning Using Water

We had some great designs of flood-proof houses, including William's fabulous floating house!

Writing – Living Through Lockdown

Use the questions to help you write about your experience of lockdown. I have written about mine to give you an example. Feel free to handwrite or type and change the format in any way you like (e.g. add pictures, videos). I have uploaded both Word and pdf files – use whichever is easiest.

PTO!

Spellings – Week 28

When you complete this week's spellings you will have finished the entire Nelson spelling book!

Study Ladder – Daily Maths and English

Activelearn – Bug Club Reading

You have all been allocated books to read. I have noticed that generally people are doing really well with multiple choice questions but not as well with written answers. Make sure you a) read the question carefully, b) give a detailed answer and c) check it again before clicking "OK". ☺
