

We are certain that people are throwing plastic in the bin. It is being blown away and into the sea. We feel that this is killing the sea animals. For this reason we need to use less plastic.

Firstly you ask McDonalds for no lid if you don't need one. So you may think use straw packs etc because they are plastic, use paper bags and cards. Furthermore when you use plastic bags don't, use paper bags instead.

In other words don't use plastic and it won't end up in the sea.

We are sure that turtles are getting killed because our plastic is going into the sea.
We are sure that turtles are getting killed by plastic because they think it's a jellyfish.
We think that animals are getting killed because it makes them un-well for too long.

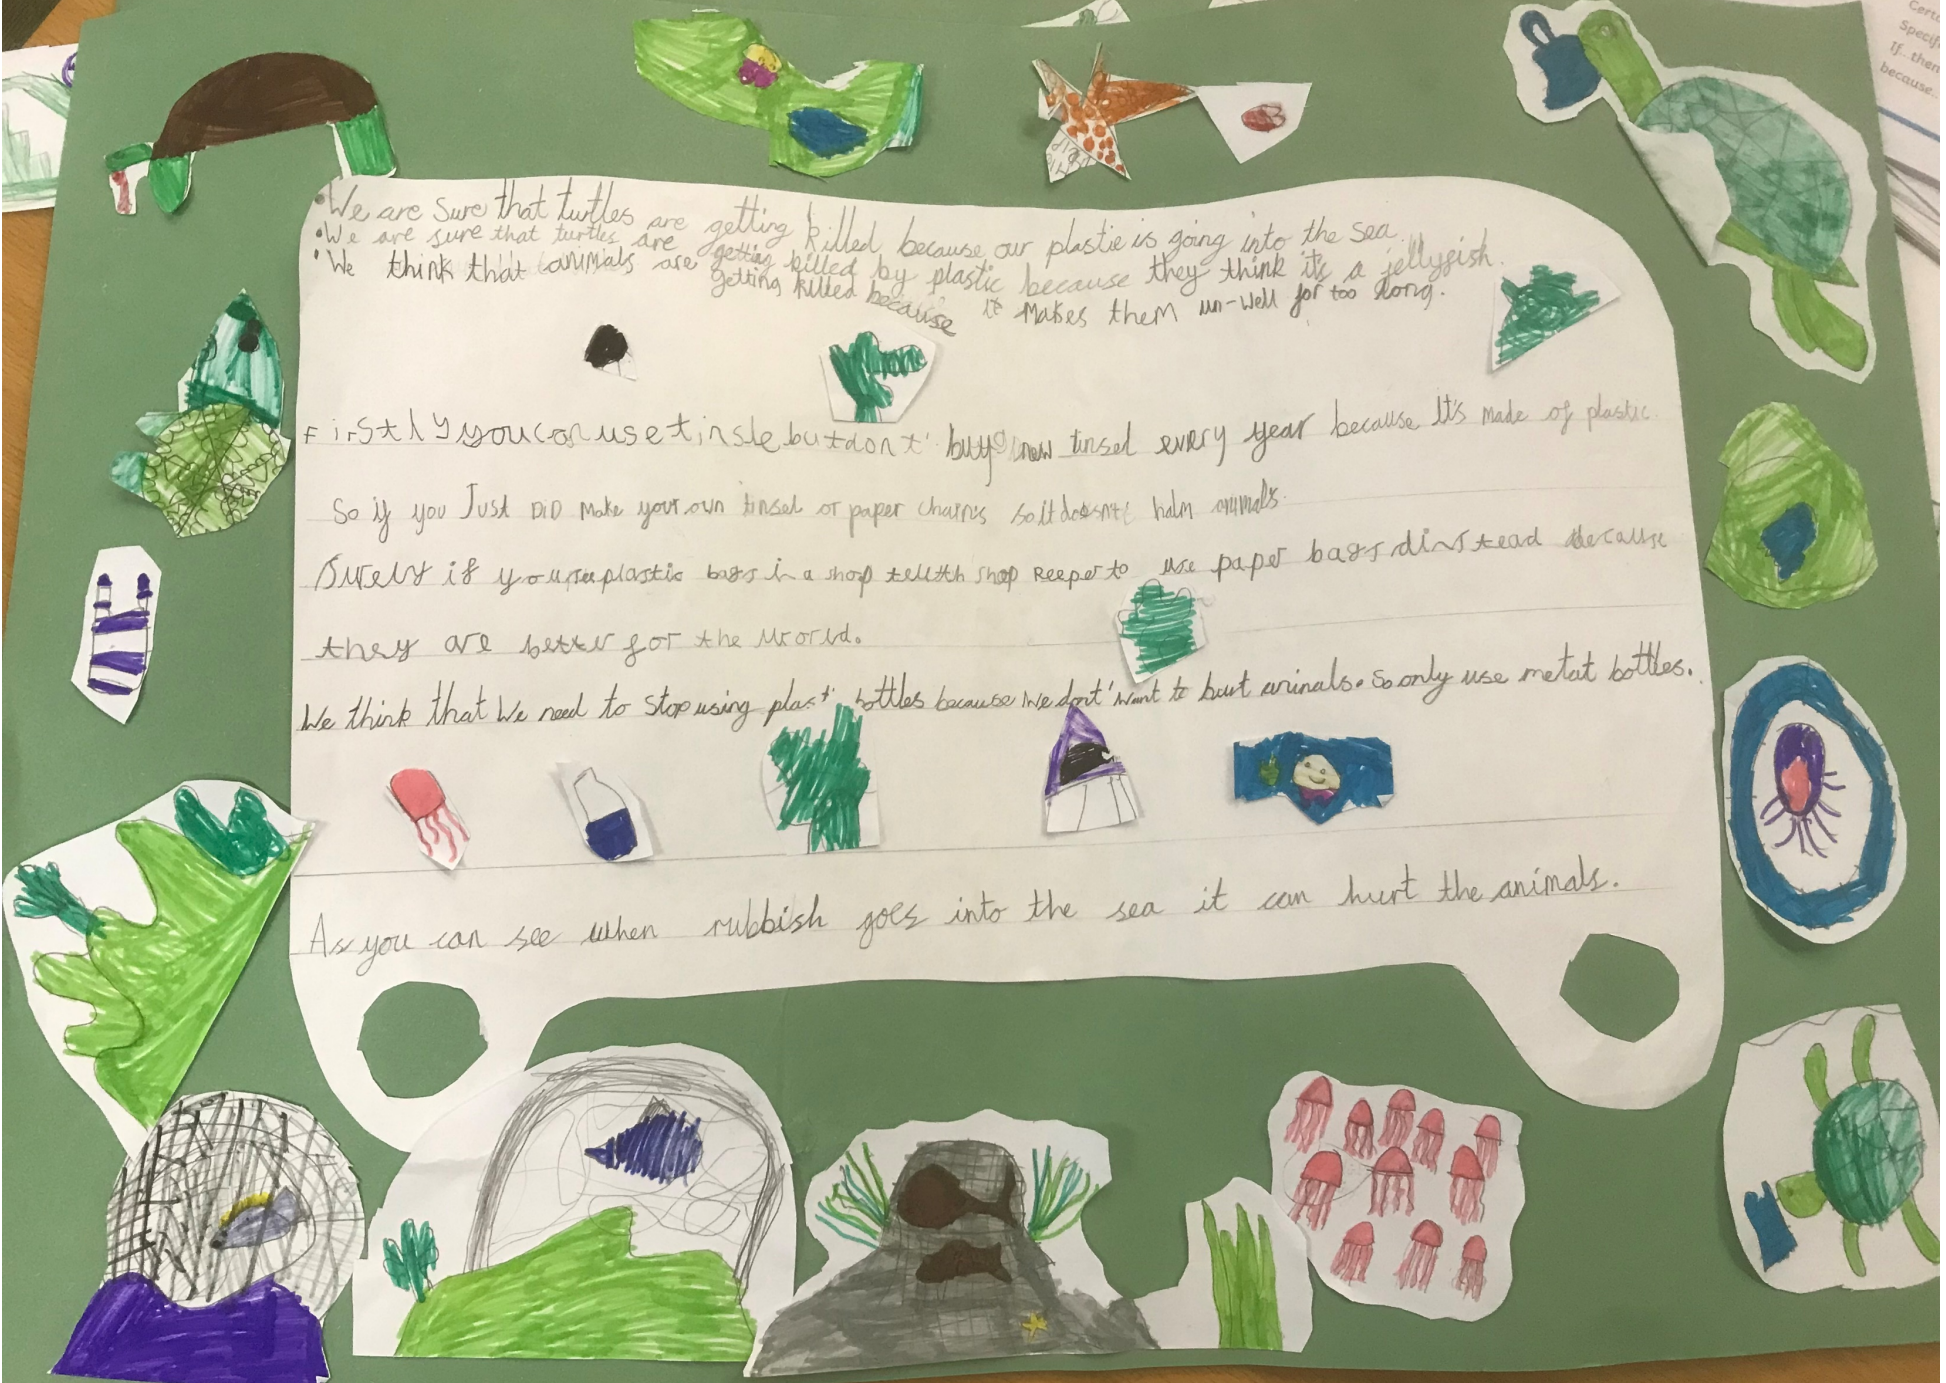

Firstly you can use tinsel but don't buy new tinsel every year because it's made of plastic.

So if you just did make your own tinsel or paper chains so it doesn't harm animals.

Secondly if you see plastic bags in a shop tell the shop keeper to use paper bags instead because they are better for the world.

We think that we need to stop using plastic bottles because we don't want to hurt animals. So only use metal bottles.

As you can see when rubbish goes into the sea it can hurt the animals.

We think now all move turtles but we are killing them by plastic because they think it's good. We are sure that the plastic is coming from us.

Firstly, when you need to use a straw don't use a plastic one use a paper one. In addition if you're buying new Christmas decorations don't buy these because it's plastic why not make your own out of popcorn. Don't buy metal straws but plastic bottles but.

As you can see there are many ways to save turtles!
