

Kingfisher class will continue to have PE on Thursdays, please come into school in your kit. Our English and Maths plans for Summer term will be available on our class page on the website. Fridays we celebrate our readers so please keep recording your child's reading at home so we can reward them. Spelling lists will not be sent home for summer term as we are having a class focus on high frequency words. We send marked homework books on Mondays during term time. Thank you for your ongoing support.

As Scientists we will be learning about the lifecycles of plants. We will explore what plants need to grow. Children will learn the names and purposes or parts of plants. We will also be planting in our outdoor area so we can put our knowledge into practise!

As Historians, we will learn about the lives of significant historical people such as The Romans and individuals such as Julius Caesar, Boudicca and current individuals making a difference to our ever-changing world Sir David Attenborough and Greta Thunberg.

As Geographers, we will be comparing our locality with parts of North and South America, exploring similarities and differences. We will build on our knowledge of these continents and learn more about climate, culture and lifestyle. Year 3 will build on this knowledge by learning about physical and human features of these areas.

As Linguists, we will listen and read the story 'Les couleurs d'Elmer' and write in simple sentences and speak simple dialogue.

We will be using various sources of information to support this including information and fiction books, Google Earth, videos and maps.

A changing world

In RSHE our mains themes are:

- Our choices and personal boundaries
- Our health

Through these topics, children will develop a deeper understanding of how to keep themselves safe, emotionally and physically healthy and when and how to ask for help.

In R.E., we will have a focus on Judaism and Christianity. We will be exploring and reflecting on big questions:

- What does it mean to belong to the Jewish Community?
- What do Christians believe God is like?

As musicians, we will continue to follow the Charanga program, this term working on improvisation. Children will explore how they can change the sounds they create with instruments and the effect this has.

We will be sharing our love of reading in class with these whole class books.

Computing – We will be learning what a 'network' is, beginning with our school network and then branching out to see how they are used in the wider world and the impact of these on our changing world.

As artists we will be inspired by the work of Andy Warhol, exploring printing, colour theory and shape. We will create our own pieces based on this and linked to our wider topic of our changing world.

As designers, we will see what the Romans taught us about architecture, find examples of this in our locality and use this as a basis for our own designs and models.
